Precaution and Notice

➢ GPS is operated and controlled under the sole responsibility of the Government of the United States of America, who are responsible for its availability and accuracy. Any changes in GPS availability and accuracy, or in environmental conditions, may impact the operation of your device .We can not accept any liability for the availability and accuracy of GPS.

➢ The PND is used only as a navigation aid. It is not for precise measurement of direction, distance, location or topography. The user must follow all traffic signs and local regulations along the roads.

➢ GPS satellite signals cannot pass through solid materials (except glass). When you are inside a tunnel or building, GPS position is not available.

➢ A minimum of 4 GPS satellite signals are needed to determine current location. Signal reception can be affected by situations such as bad weather or wireless devices or dense overhead obstacles (e.g. tall buildings).

➢ When you get out of the car, do not leave your PND on the dashboard or subject to direct sunlight. The overheating of the battery may cause malfunctions and/or dangerous conditions.

➢ For your own safety, do not operate the controls of the PND while driving. Do not mount where the driver's field of vision is blocked
In the Box

In the box you will find

Portable navigation device (PND)	SD memory card (Plugged in the unit)*
AC adapter*	Car charger
Car mount system	Carry case*
User manual	Software manual*
USB cable	Warranty Card*

* Optional accessories

I Basic Introduction

1. Overview

(1) Charger Indicator Light
(2) Power Switch
(3) Speaker
(4) SD Card Slot
(5) Earphone Jack
(6) Reset Key
(7) USB Connector

2. Accessory

2.1 Charging by AC adapter

Please use the AC adapter to charge the device for the first time. To maximize the life of the battery, the device must be full of charge for the first time.

Plug the adapter's DC port into the device's USB port on its right-side panel

Plug the adapter into the main supply socket.

The charging indicator will light. When the unit is fully charged, the red indicator will turn blue.

2.2 Charging by Car Charger

The car charger supplies power to your device when you are using the device in a car.

Caution: To protect your device against sudden surges in current, connect the car charger only after the car engine has been started. Connect one end of the car charger to the power connector of your device. Connect the other end to the cigarette lighter in the car to power and charge your device.
1. Device power connector
2. Vehicle power connector

2.3 USB Cable usage

The USB cable is provided for system upgrades. This USB cable will work on the PC either with Microsoft Active Sync® or as a mass storage media. You can select the mode in the "Setting-USB" menu.

For upgrade and more information about Microsoft Active Sync, please visit Microsoft web.

2.4 Install the Car Mount System

Take off the protected film on the bottom of the suction. Then put the bracket onto a suitable location of your windscreen or side window, make sure the window or the suction or windscreen is clean and without water and some dirty things inside, fixing the stand on that position. Never place the stand where the driver's field of vision is blocked.

If the car's windshield is tinted with a reflective coating, an external antenna (optional) may be needed to route the roads. The external antenna is stick to the top of the car through a window. When closing the car window, be careful not to pinch the antenna cable (Cars with an anti-jam window design may automatically leave adequate space as needed.).

Install PND into the holder

5

To remove the bracket, three steps as below:

Press 2 side button, pull left lightly and then take off the suction. If the bracket still doesn't detach from your windscreen, tug gently on the clear plastic tab at the edge of the suction mount, to break the vacuum seal.

Step 1: Rotate screw to lock it onto car glass

Use the two screw to adjust the angle and direction of the PND

Step2: Install the holder into the Car cradle by the sockets

Ⅱ Main function introduction

1. Starting up

Insert the supplied SD card (optional) into the slot at the bottom of device.
Starting up then enter into the main function operation screen as below.

6

2. Power saving

Press the power button [power icon] on the top side of your device to turn off your device, the device actually enters a suspend state and the system stops operation. Once you turn on the system again, it resumes.

3. Main Functions
